PRELIMINARY AMENDMENT

Sir:

Prior to calculation of the filing fee and examination the merits, please amend the above-identified application as follows:

IN THE CLAIMS:

Please amend claims 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 14, 15, 17, 21, 23, and 25 as follows:

3. (*Amended*) Arrangement as claimed in [claims 1 or 2] claim 1, characterized in that said mobility transparency means are introduced to the application designers at the requirement and functional specification phases, i.e., by integrating mobility function (M) totally into the infrastructure of a platform.

4. (*Amended*) Arrangement as claimed in [any of the preceding claims] claim 1, characterized in that said mobility transparency means are so adapted that computational objects are mapped to engineering objects (EO) so as to be none-visible in the computational model of the application in question.

5. (*Amended*) Arrangement as claimed in [any of the preceding claims] claim 1, characterized in that the mobility function constitutes the engineering object interceptor, i.e., being arranged at the boundary between the terminal domain and the telecom system domain.
